

PLAYGROUND FLOORINGS

PU RECOVER GL SYSTEM

Special formulated UV-resistant polyurethane, two component, mat and glossy coating with additives, with the parallel use of **EPDM 857** - epdm powder and then **POLYSPORT 1062** to plasticize completely the flooring.

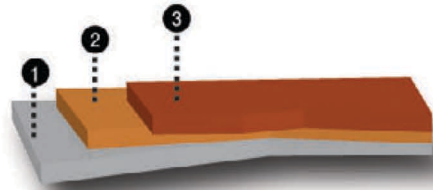

Economical coating to refresh and recoat old faded playground floorings or any other rubber floorings from Epdm granules or SBR granules.

Applied on faded, Epdm wet-pour rubber cushion surfaces, Epdm or recycled coloured rubber safety tiles to create a new colored top surface with high UV resistance.

Steps:

1. **POLYSPORT 1062** - UV-resistant polyurethane coating.
Applied by rollers.
2. **EPDM 857** - EPDM powder.
3. **POLYSPORT 1062** - UV-resistant polyurethane coating.
Applied by spray or roller to plasticize the flooring.

Description	Consumption
POLYSPORT 1062 - UV-resistant polyurethane coating.	0.3kg/m ²
EPDM 857 - EPDM powder.	0.5kg/m ²
POLYSPORT 1062 - UV-resistant polyurethane coating.	0.4-0.5kg/m ²
